Subject: Sample Shipment/Regional COC for MCHM/PPH Sample collected, West Virginia Chemical Leak Site

Ms. Caporale,

Attached is the Regional COC for a sample of 4-methylcyclohexane methanol/PPH product collected at the West Virginia Chemical Leak site and was shipped to OASQA for delivery tomorrow morning. The COC has shipping info. As per your discussion with OSC Raj Sharma, the sample was shipped prior to assignment of a DAS case number. An analytical request will be prepared and submitted to Client Services by tomorrow morning.
